2.4 Notes to the financial statements

Accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below:

Functional and presentation currency

The functional currency of the ultimate Parent Company, Cable & Wireless Communications Plc, and the majority of trading and financing companies of the Group, of which the Company is a member, is the US Dollar. In respect of the Company, the directors consider the US Dollar to be the functional currency reflecting the economic effects of the underlying transactions, events and conditions for the Company. The Company therefore presents its financial statements in US Dollars. The Company's presentation currency is also the US Dollar.

Basis of preparation

The Company qualifies as a large sized company and the financial statements are prepared in accordance with accounting principles generally accepted in the Netherlands and comply with the financial reporting requirements included in Part 9 of Book 2 of the Dutch Civil Code. The financial statements are prepared under the historical cost convention and presented in US Dollar ("USD"). Assets and liabilities are stated at nominal value, unless otherwise stated. If deemed necessary, a provision is deducted from the nominal amount of accounts receivable.

Payables and receivables

Payables are included at face value. Receivables are included at face value, less any provision for doubtful accounts. These provisions are determined by individual assessment of the receivables. Short term payables and receivables are reclassified to long term if it is expected that the amounts will not be repaid or recovered within twelve months after the balance sheet date.

Revenue recognition

Interest income and expense are recognized in the income statement based on accrued amounts. Operating expenses are accounted for in the period in which these are incurred. Losses are accounted for in the year in which they are identified.

Foreign currencies

Assets and liabilities denominated in foreign currencies are translated at period-end exchange rates. Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions: gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognized in the income statement. Non-monetary balance sheet items, which are valued at cost and resulting from transactions in foreign currencies, are translated at the rate prevailing on the date of the transaction.

2.4 Notes to the financial statements

Permanent and temporary differences may exist between the result before taxation as presented in these financial statements and the fiscal result for corporate income tax purposes. Temporary differences between the reporting for tax purposes and the financial statements are recognized as deferred taxes based on the statutory tax rate expected to exist in the future. Deferred tax assets and liabilities are netted. Net deferred tax assets will be included in the balance sheet if actual recovery is assumed possible by the Company's management.

Estimates

The preparation of the financial statements requires management to make estimates and assumptions that influence the application of principles and the reported values of assets and liabilities and of income and expenditure. The actual results may differ from these estimates. The estimates and the underlying assumptions are constantly assessed. Revisions of estimates are recognised in the period in which the estimate is revised and in future periods for which the revision has consequences.
